

Miracles of Nature

Documentary serial mapping the most beautiful and interesting places of our planet.

13 x 26' HD

Patagonia – Perito Mureno • Hungarian Pustasta • Lactite Caves Agtelek • New Zealand • Poland – Lakes Of Mazurská • Fiji • Marrakesh, Morocco • Atlas Mountainsmalawi • France, Champain • The North Pole • Reunion – South Africa • Nairobi • Russian Karelia • Laponia • New South Wales – Blue Mountains • Jemen • Oman • Lipar Islands • Mongolia – Desert Gobi • Costa Rica • Antigua And Barbuda • Atlantida - Town Trujillo • Mantanzas • British Virgin Islands • Islandkurzems Region • South Laos • Delta Of Danube – Romania • Gibraltar • Czech Paradise • Central China • Shetlands • South Moravia • Scottish High Lands • Andalusia • Baikal • Madeira • Jersey • Taiwan • Bali • South Israel – Negev Desert • Golan Heights • North Vietnam • Algarve • Mendoza

Miracles of Nature 1

In this episode, we discover breath-taking glaciers in Argentina, infinite plane in the middle of Europe, thermal miracles of Hungary, stalactite caves protected by UNESCO and most active volcano of New Zealand – White island. This and more in Miracle of Nature 1.
Topics:

Patagonia – Perito Mureno – fascinating “travelling” glacier. The only one glacier which grows in the world.

Hungarian Pusta – The infinite plane in the middle of Europe. The only one European prairie.

There is a unique system of thermal water rising on the ground at the temperature up to 75° of Celsius. Splendid rock shape – the only one in Europe, reminding the Turkish Pamukale.

Stalactite caves Agtelek – the largest stalactite cave system in this part of Europe

New Zealand – the most active volcano in New Zealand and the whole volcano system of the region Bay of Plenty

Miracles of Nature 2

Lovely lake landscape, hidden in the large Poland, and bison’s reservation, as well as majestic mountains Atlas in Morocco. On the same continent we can find also the Large rift valley in Malawi and can compare it to the landscape Fiji. This and more in Miracle of Nature 2.
Topics:

Poland – lakes of Mazurská – the largest lake region of Poland. The breath-taking landscape and local fauna and flora. The most numerous occurrence of bison in the Europe.

Fiji – isolated ensemble of 322 islands of volcanic or coral origin, found in the tropical zone in the Pacific ocean. One of the most interesting and beautiful lands in the Oceania.

Marrakesh, Morocco – region of Marrakesh is the most amazing region of Morocco.

Atlas Mountains – system of wrinkled-fissure mountains in the north west Africa. It is 2000 kilometres long and is the most majestic mountain range in this part of the world. It is the biggest mountain of north Africa.

Malawi – The Large rift valley goes through the whole country, from the north to the south, and its bottom is watered with the lake Malawi which is the third largest African lake. The highest mountains Shire Highlands, with its peak Sapitwa, reach 3002 m in the south-east.

Miracles of nature 3

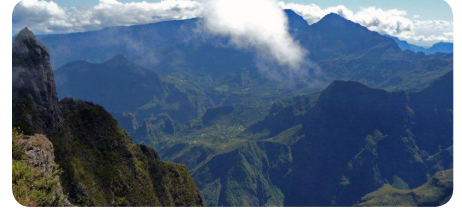

Contrasts of the world. The fertile land of French Champain, where wine and truffles go so well, on one side and the North Pole, with its “death zone” on the other side. Let’s get warm up on the island Reunion where the most active volcano in the world is found. This and more in Miracle of Nature 3.
Topics:

France, Champain – the most famous wine region in the world. A unique climate, thanks to which the popular fizzy drink is produced here. Truffles – a mushroom with the value of the gold, it grows here and it is processed here.

The North Pole – a landscape in which it is not possible to live. Unique pictures of the kingdom of ice, frost and loneliness... The Norwegian Spitsbergen, polar caves, core of glacier – all about the most impressive place on the Northern hemisphere.

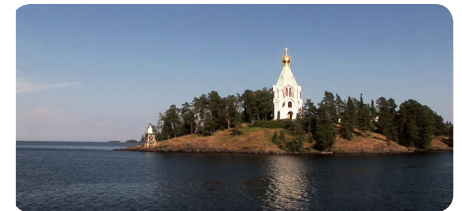

Reunion – South Africa – Reunion, together with Mauritius and Rodriguez, create an ensemble of islands Mascarena, east of the Madagascar island. The highest peak is Piton des Neiges and it is 3 069 meters high, but there is also an active gable volcano, called Piton de la Fournaise, 2631 meters high, which is the most active volcano on the earth.

Miracles of nature 4

The African safari is an immense miracle of the nature. It is like big theatre with endless repertoire. In the contrast to the carefree and “warm” Africa we will present the Russian Karelia. Giraffes are replaced by bears, the prairie by Russian prairie... Bears are replaced by kangaroos in Blue mountains and eucalyptus forests. This and more in Miracle of Nature 4.
Topics:

Nairobi – safari, what more to say? Maybe the amazing variety of African fauna and its typical representatives – antelopes, giraffes, zebras, emus, marabu birds

Russian Karelia – famous lake Ladoga, typical Russian fauna and flora, Solovetsky islands with thrilling history.

Laponia – country of midnight sun, caribos and elks, country of pure nature and endless large space.

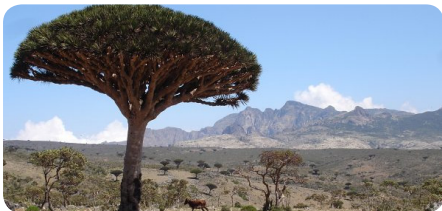

New South Wales – Blue mountains, called after the blue vapour over them, caused by eucalyptus plants.

Miracles of Nature 5

The episode focused on the Arabian peninsula. The endless red desert in Oman contracts with Jemen's island Socotra. The endemic crabs from Socotra compete with sea turtles who brings their eggs only to the only one beach in Oman. Rare plants, presented only here and fossilized Noah's ark.... This and more in Miracle of Nature 5.

Topics:

Jemen – Since the Roman period, the Jemen is called the happy Arabia. 1000 years before Christ the paradise on the earth was located here. We can also see the fossilized Noah's ark. The Jemen's island Socotra will present endemic crabs, desert roses or tree of dragon's blood.

Oman – In the neighbourhood of Jemen a very bright country with several "miracles of nature" is found. The eggs laying by sea turtles might be the greatest one, including the newly born turtles trying to reach the sea.

Miracles of Nature 6

A various episode which starts with likeable islands near the Italian Sicily where we can study local volcanoes. But the top of this episode goes to the Gobi desert in Mongolia. We can also take a pleasure in the beauty of Costa Rica. This and more in Miracle of Nature 6

Topics:

Lipar islands features the pleasant Mediterranean climate. Their shore is rugged, full of steep cliffs. The landscape character is given by expressive cones of particular volcanoes. They are covered by abundant vegetation. But there also totally bare places with light pumice full of black obsidian. The volcanic activity, mainly on the islands Vulcano and Stromboli, is the most interesting thing in this nature without any question.

Mongolia – desert Gobi – one of the oldest and biggest deserts in the world, which also features several irregularities differentiating it from others. It is found in the northern China and south Mongolia. The desert is limited by the Altai mountain and grassy prairies of Mongolia in the north, by Tibetan high plane on the south west and by the Large Chinese lowlands on the south-east.

Costa Rica – Place of rest of "retired" Greenpeace. This means that the local nature is very unique. The backbone of country is made of three volcanic mountains, going from the Northwest to the south-east through the whole state territory. The largest part of lowlands, near the ocean, is covered by wetland and swamps. More that a third of the country is covered by forests.

Miracles of Nature 7

This episode is dedicated for the most part to the Caribic Islands. We will present the beauty of local nature as well as its cruelty in form of the town destroyed by hurricane or in form of pictures of active volcano Monserrat, which was able to destroy the prosperous island. This and more in Miracle of Nature 7.

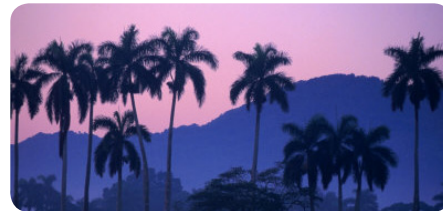

Topics:

Antigua and Barbuda – True miracle of the nature - lagoon Codrington. An unique natural phenomenon, the water in this lake is saltier than the surrounding sea and that is why crawfish can live here. In dense mangrove vegetation majestic frigate birds live. Sea birds who cannot swim....

Atlantida - town Trujillo – town destroyed by hurricane Mitch, pineapple fields and plantations around the town.

Mantanzas – the most beautiful beach in the world, Varadero, on the peninsula Peninsula de Ikakos.

British Virgin Islands – mangroves to be the protection against hurricanes and tsunami, turtles, national park D'Bas.

Miracles of Nature 8

"There where the Island is, the day burns like the wax-candle wick", as one country song sings. In this episode we are focused on the miracles of nature of the Island's nature, the breath-taking ones. Splashing gushers, volcanic lakes, volcano.... And we stay on the north. In the Latvian Kurzems we can observe oxes near the northernmost vineyard in the world. This and more in Miracle of Nature 8.

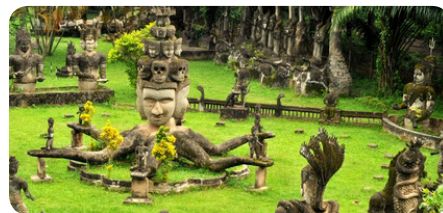

topics:

Island – there is over 200 volcanoes here, 30 of them are active, this is a presentation of the most beautiful and fantastic landscape of the world!

Kurzems region – western region of Latvia, its shore touches the Baltic sea as well as the Riga bay, and is called the Kurzems region. Deep forests on the north hide many surprises. For example herds of wild horses or oxes, who were bred by zoologists after their extermination and newly allowed into the nature. The widest natural waterfall in Europe, pictures of the waterfall – it is not high too much.

South Laos - In contrast with volcanoes on the north, we present the high plane Bolaven and the reservation Donguansao in the south Laos

Miracles of Nature 9

Danube, the most important river in the Eastern Europe, leads to the Black sea. Its delta belongs to the miracles of nature, as well as the sand to the beach. On the opposite side of the continent, the Europe is guarded by the proud rock - Gibraltar. As it does not pertain here. It is so exceptional that it can change the weather. The weather has formed lovely rock shapes on the other place. We will visit the Czech paradise. This and more in Miracle of Nature 9.

Topics:

Delta of Danube – Romania – debouchment of one of the most important rivers of Europe. the breath-taking landscape and natural richness of this region forms an unique atmosphere that is worthwhile.

Gibraltar – Cape of the Europe, in form of majestic rock on which top the only one European colony of monkeys – of Makak, live. The inside of this rock hides a mysterious stalactite cave, reputedly going up to the Africa. Gibraltar was one of pillars of the world. There the glamorous world ended.

Czech paradise – After thousands of years, the weather has created phenomenal sandstone shapes. The Czechs call the landscape around them the Czech paradise and they sing about it in their national anthem...

Miracles of Nature 10

This time we discover miraculous lovely mountains of the Yellow emperor in the central China. Then we pass to the Shetland Islands where we describe the smallest horse in the world. Even the Shetland's pony has been bred by people, his existence is a miracle also. In the South Moravia we are seduced by the magic of meanders of river Morava, creating caves under the fertile ground for thousands of years, and these caves can be compared to the most beautiful stalactite caves our planet. This and more in Miracle of Nature 10.

Topics:

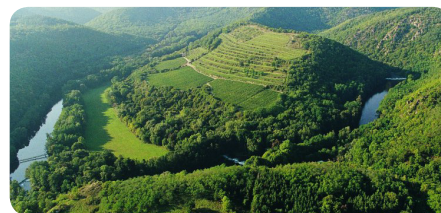

Central China – The nicest Chinese mountains are considered to be the "national treasure". They cover the surface of one hundred

fifty square kilometres and reach the sky with seventy lovely granite peaks. Thanks to three natural miracles the Yellow mountains are famous in the world – the first one includes particular pine-trees growing on edges of rocks. The Chinese poems sing about them as about "flowers growing from the dreaming calligraphy brush..." The second one includes local exotic stones and rocks actuating our imagination. The third miracle includes western Cloudy sea and northern Foggy sea.

Shetlands – The smallest ponies in the world, in the lovely northern landscape where unique birds called puffins live and where sheep with the finest wool live...

South Moravia – meanders of river Morava, caves Javořičské and rare orchids meadows...

Miracles of Nature 11

This episode describes the greatest miracle of nature that could be created by the human brain. The Loch Ness monster. It looks that it does not exist but thousands of visitors still come to see the lovely lake and to hear tales about it. Not only Nessi, but the Scottish high lands are the miracle of nature. Then we quickly visit Andalusia and remove our hat in front of the majestic mountains of Sierra Nevada. The deepest lake in the world is found in Siberia. We will talk about Baikal, the natural miracle of Russia. This and more in Miracle of Nature 11.

Topics:

Scottish high lands – rough mountains of northern Scotland cover many secrets. The cenozoic monster is told to live in the lake, or in better way, the Nessie lives here. Even nobody make its video and the dream about its existence evaporates, there are still some people who look for it all life...

Andalusia – the landscape of Andalusia is variable as clouds over it. You find here mountains, green paradises as well as semi-deserts. The mountains Sierra Nevada belongs amount the roughest mountains in the Europe.

Baikal – It is the largest lake in Siberia and, after the Caspian sea, the second largest one in Russia and the deepest lake in the world. Baikal is created in the deep rift valley, between two tectonic plates which space out by 2cm every year. It is the oldest lake in the world, its age is estimated at 25 up to 30 million years. It is surrounded with mountain edges of height up to 2000 m over its water level.

Miracles of Nature 12

In this episode of Miracles of Nature we visit several islands in different parts of the world. We can expect breath-taking terrace rocks of Taiwan or majestic volcano on the mythic island Bali. Almost forgotten island Jersey, after which a part of New York is named, discloses one of the greatest reflux in the world and finally we visit spectacular Madeira, which features amazing variety of landscape at only several kilometres.

Madeira

The island Madeira is mainly known due to its strong wine called after it and popular all over the world. Hardly anybody knows that it is an amazing volcanic island. Its surface takes only several square kilometres but local peaks reach nearly 3.000 meters above the sea. You could hardly look for another place with such variable landscape. During wandering in Madeira we can believe you see Norwegian fiords, alpine tops next to them and place reminding the Scottish highlands. That is why it is said that Madeira is not for swimming but for looking. This all together with its lovely climate thanks to which Madeira is also called the island of permanent spring and is visited for its healing effect, in the past also by the Austrian empress Sisi.

Jersey

In the English channel, between France and England, you find almost forgotten Channel Islands. In the past, they were popular as the place of trips for British elite, as well as the reason for disputes between France and England. Today they are known as the tax paradise and their natural beauty takes a back seat. In doing so, the reflux in Jersey is one of the biggest ones in the world and the surface of islands gets doubled during this reflux.

Taiwan

The island is called the "Terrace bay" in Chinese, the Portuguese discoverers called it "Ilha Formosa". Both titles suit to this lovely island very well. Thanks to the tectonic unstable subsoil the amazing natural sceneries were created on Taiwan, for example the national park Yangmingshan or breath-taking gorge Taroko Gorge.

Bali

Bali is defined as the last place in the world where demons and gods visit the earth and people. Local inhabitants believe that many of them lives inside the majestic volcanoes, among which the volcano Gunung Batur belongs. This volcano endangers the people but on the other hand it offers the fertile ground and living to the island's inhabitants.

Miracles of Nature 13

In this episode of Miracles of Nature we visit the Holy Land, following the foot marks of biblical pilgrims. We visit intact desert oases, we discover miracles of mysterious Death sea and we can find that the inhospitable Negev desert can be the place for living. In the south American Andes we climb their highest top and then we move to Asia to be amazed with particular rock shapes in the Halong Bay.

South Israel – Negev desert

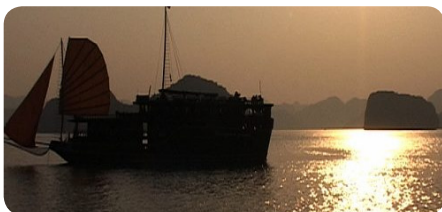

The Death sea is one of the most know miracles of nature. Everyone knows that its water upholds so that you can rest on its level without swimming. But its water and mud have also healing effect, as well as its air has genial effect. That is why the region of Death sea is also called the largest natural spa in the world.

The Negev desert, with impressive crater Maktesh Ramon, has effect of unkindly place at the first sight, but in spite of it it is a place full of life. You can see plants on unexpected places, herds of ibex and also rests of human activity. A lot of biblical prophets went to the desert to contemplate, caravans transported rare goods from India to the Mediterranean countries and its terraces, old for two thousand of years, still give wine and olives.

Golan heights

Golan heights, thanks to its strategic position, became the famous place of disputes and tension in the Middle East. In spite of this reputation, the nature here is famous, with deep gorges and spring of the river Jordan which is the source of water for the whole region. It pours into the Galilean sea at which shore Jesus made his miracles and preached to his apostles.

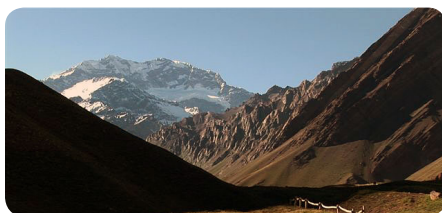

North Vietnam

Halong bay, so-called Dragon's bay, is named after its hundreds of rocks, reminding the dragon's teeth. This amazing natural phenomenon was also the place of beginning of Vietnam's war.

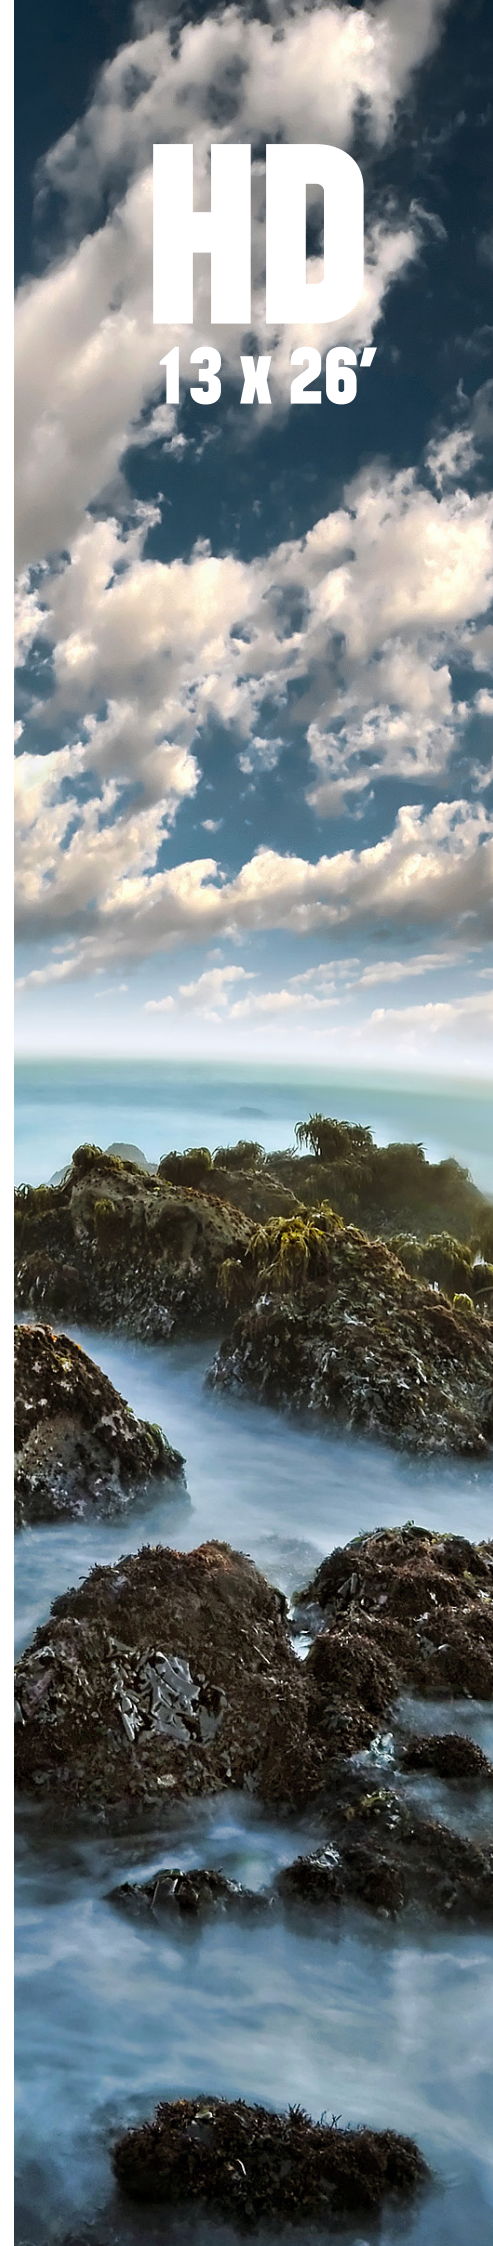

Algarve

No less pictorial shore of south Portugal, formed by wind and sea waves and presenting lovely rock shapes and beaches attracting visitors from the whole Europe.

Mendoza

And at the end, we visit south American mountains, Andes, directly their highest peak Akonkagua.
